Gabriel Eremie

(778) 512 - 4454 • gabriel.eremie@yahoo.com • Portfolio • Burnaby, BC

Summary

Computer Science graduate with expertise in UI/UX design, software development, and working in high-pressure environments. Skilled in developing user-friendly applications, troubleshooting technical and workflow issues, maintaining quality standards, and following established procedures. Demonstrates strong analytical, problem-solving, communication, and teamwork skills, with the ability to adapt efficiently to changing priorities. Eager to contribute to a dynamic team by applying technical knowledge, practical experience, and a commitment to continuous learning.

Technical Skills

- Python and C++
- JavaScript, HTML, and CSS
- React and Node.js
- Version control with Git
- Computer hardware and software
- Technical troubleshooting
- Software testing
- Database management and SQL

Work Experience

Evolution, New Westminster, BC

Game Presenter (Sep 2025 – Present)

- Host live Blackjack, Roulette, and Baccarat games in a professional broadcasting studio serving online players in real time, maintaining accurate and uninterrupted gaming operations.
- Maintain a high standard of game accuracy and integrity by following established operational procedures, broadcasting standards, regulatory requirements, and company policies.
- Monitor gameplay closely and maintain exceptional attention to detail to ensure game actions, outcomes, and procedures are executed accurately and consistently.
- Work effectively in a high-pressure, time-sensitive environment where accuracy, rapid communication, and adherence to procedures are essential to maintaining service quality.
- Collaborate with production, technical, and support teams to help maintain seamless live broadcasts and uninterrupted gaming experiences.

- Communicate clearly and professionally with players and internal teams while responding appropriately to situations that may affect the gaming experience.
- Apply strong situational awareness and problem-solving skills when managing unexpected situations during live gameplay while maintaining professionalism and operational standards.
- Maintain compliance with provincial gaming regulations, responsible gaming practices, and internal policies throughout live operations.
- Adapt quickly to changing operational conditions while maintaining consistent performance, accuracy, and attention to detail.
- Work rotating shifts, including overnight hours, demonstrating reliability and effectiveness in a 24/7 live-service environment.

Fabriclean Laundry Services, Kamloops, BC

Industrial Laundry Worker (May 2023 – Aug 2023)

- Managed washing and drying operations for over 200 bulk laundry orders weekly while adhering to strict client specifications.
- Conducted routine equipment inspections and preventive maintenance, reducing machine downtime by 30%.
- Identified equipment and workflow issues and implemented corrective actions to maintain operational continuity.
- Achieved 99% accuracy in sorting, folding, and order preparation under strict quality standards.
- Trained three junior team members on operational procedures and equipment maintenance, enhancing productivity by 25%.
- Operated effectively in fast-paced environments requiring attention to detail and teamwork.
- Ensured compliance with established procedures to support consistent service delivery.

FreshPoint, Vancouver, BC

Food Production Worker (May 2022 - Aug 2022 & May 2021 - August 2021)

- Executed food packaging machinery operations, handling more than 5,000 units per shift while maintaining safety standards.
- Tracked production processes and documented data for quality control, resulting in a 20% reduction in errors.
- Improved production-line efficiency by 15% through identification of workflow inefficiencies.
- Adhered to established procedures and health guidelines within high-volume production environments.
- Teamed with 10 colleagues to optimize shift transitions, decreasing downtime by 10%.
- Achieved consistent work performance while balancing urgent production and

quality requirements.

Technical Projects

AI Training Quiz Builder — UI/UX Developer
September 2020 – April 2025

- Designed clean, responsive interfaces focused on usability, accessibility, and intuitive navigation.
- Improved user interactions and engagement through user-focused design and voice-command functionality.
- Tested application workflows and used feedback to identify usability issues and improve the overall user experience.
- Collaborated on implementing and refining features to create a reliable and user-friendly application.

Cross-Platform Shopping Cart Systems — UI/UX & Software Developer
September 2020 – April 2025

- Designed and developed user interfaces across desktop, web, and mobile platforms.
- Focused on creating intuitive shopping workflows, clear navigation, and consistent user experiences.
- Tested interfaces across platforms to identify usability issues and improve mobile and web experiences.
- Applied responsive design and reusable components to maintain consistency across applications.

Education

Bachelor of Science in Computing Science
Thompson Rivers University, Kamloops, BC Apr 2025

Bachelor of Science in Computing Science (Transferred)
Columbia College, Vancouver, BC Apr 2020

Certificates

Become a pro advanced-level C++ programmer in 50 Days (Udemy)
Standard First Aid & CPR — Level C / BLS

FoodSafe Level 1

Workplace Hazardous Materials Information System (WHMIS)
