

Summary

Computer science graduate with experience as an evolution game presenter in a fast-paced live casino environment. Proven ability to maintain game accuracy and integrity while adhering to operational procedures and regulatory standards. Strong technical skills in software development, databases, and troubleshooting, complemented by excellent communication and analytical abilities. Aiming to leverage expertise in service support to enhance table uptime and minimize service disruptions.

Technical Skills

- Computer hardware and software
- Technical troubleshooting
- Software testing
- Database management and SQL
- Python and C++
- JavaScript, HTML, and CSS
- React and Node.js
- Version control with Git

Professional Experience

Evolution

September 2025 to Current

Game Presenter

New Westminster, Canada

- Host live Blackjack, Roulette, and Baccarat games in a professional broadcasting studio serving online players in real time, maintaining accurate and uninterrupted gaming operations.
- Maintain a high standard of game accuracy and integrity by following established operational procedures, broadcasting standards, regulatory requirements, and company policies.
- Monitor gameplay closely and maintain exceptional attention to detail to ensure game actions, outcomes, and procedures are executed accurately and consistently.
- Work effectively in a high-pressure, time-sensitive environment where accuracy, rapid communication, and adherence to procedures are essential to maintaining service quality.
- Collaborate with production, technical, and support teams to help maintain seamless live broadcasts and uninterrupted gaming experiences.
- Communicate clearly and professionally with players and internal teams while responding appropriately to situations that may affect the gaming experience.
- Apply strong situational awareness and problem-solving skills when managing unexpected situations during live gameplay while maintaining professionalism and operational standards.
- Maintain compliance with provincial gaming regulations, responsible gaming practices, and internal policies throughout live operations.
- Adapt quickly to changing operational conditions while maintaining consistent performance, accuracy, and attention to detail.
- Work rotating shifts, including overnight hours, demonstrating reliability and effectiveness in a 24/7 live-service environment.

Fabriclean Laundry Services

May 2023 to August 2023

Industrial Laundry Worker

Kamloops, Canada

- Managed washing and drying operations for over 200 bulk laundry orders weekly while adhering to strict client specifications.
- Conducted routine equipment inspections and preventive maintenance, reducing machine downtime by 30%.
- Identified equipment and workflow issues, implementing corrective actions to maintain operational continuity.
- Achieved 99% accuracy in sorting, folding, and order preparation under strict quality standards.
- Trained three junior team members on operational procedures and equipment maintenance, enhancing productivity by 25%.
- Operated effectively in fast-paced environments requiring attention to detail and teamwork.
- Ensured compliance with established procedures to support consistent service delivery.

FreshPoint

May 2022 to August 2022

Food Production Worker

Vancouver, Canada

- Executed food packaging machinery operations, handling more than 5,000 units per shift while maintaining safety standards.
- Tracked production processes and documented data for quality control, resulting in a 20% reduction in errors.
- Improved production-line efficiency by 15% through identification of workflow inefficiencies.
- Adhered to established procedures and health guidelines within high-volume production environments.
- Teamed with 10 colleagues to optimize shift transitions, decreasing downtime by 10%.
- Achieved consistent work performance while balancing urgent production and quality requirements.
- Also worked here from May 2021 - August 2021

Technical Projects

AI Training Quiz Builder — Full-Stack Developer

September 2020 – April 2025

- Developed a collaborative web application using GPT-4, React, Firebase, and JavaScript to automatically generate quizzes from user-uploaded materials, reducing manual quiz creation time by 90%.
- Integrated Firebase for real-time database management and user authentication while maintaining reliable application functionality across user workflows.
- Conducted A/B testing and load simulations to identify performance issues and improve application stability under peak traffic.
- Analyzed application behavior and testing results to improve quiz completion rates by 15% and support reliable system performance.
- Implemented voice-command functionality and tested application interactions to improve usability and user engagement by 25%.
- Applied structured problem-solving and troubleshooting throughout development, testing, and optimization of the application.

Cross-Platform Shopping Cart Systems — Software Developer

September 2020 – April 2025

- Developed desktop, web, and mobile applications simulating complete e-commerce workflows, including authentication, product management, cart operations, and checkout.
- Implemented secure authentication, dynamic data handling, and transaction workflows while achieving 99% transaction accuracy during testing.

- Conducted application testing and performance optimization, improving page-load times by 40% and mobile usability scores by 20%.
- Used reusable components, standardized development practices, GitHub Actions, and Firebase Hosting to streamline testing and deployment workflows.
- Analyzed application performance and identified opportunities to improve reliability, usability, and development efficiency.
- Worked across C++, Java, XML, React, HTML, Firebase, and Git-based development environments, demonstrating strong computer literacy and adaptability across technologies.

Education

Thompson Rivers University

April 2025

Bachelor of Science: Computing Science

Kamloops, BC

Columbia College

April 2020

Bachelor of Science: Computing Science

Vancouver, BC

Transferred to Thompson Rivers University

Certifications

- Standard First Aid & CPR — Level C / BLS
- FoodSafe Level 1
- WHMIS — Workplace Hazardous Materials Information System
- Occupational First Aid Level 2 — Willing and able to complete as required by the company
